

# XDrum DD 520 Digital Drum

User manual

# Congratulations!

Thank you for purchasing this digital drum set. The drum set has been Developed to act and play like a drum set but with greater ease. Before you use the instrument, we recommend you to read through this manual.

# Taking care of Your Digital Drum Set

#### Location

- Do not expose the unit to the following Conditions to avoid deformation, discoloration or more serious damage.
- Direct sunlight.
- High temperature (near a heat)source, Or in car during the day time).
- Disconnect all cables before moving

#### **Power Supply**

- -make sure to use the suitable AC adaptor, and also make sure the ac outlet voltage at your country matches the input voltage specified on the AC
- AC adaptor's label.
- -Turn the power switch OFF When the Instrument is not in use.
- -An AC adaptor should be unplugged from the AC outlet if the instrument is not be used for an extended period of time.
- Unplug the AC adaptor during electric storms.
- -Avoid plugging the AC adaptor into
- -The same AC outlet as appliance with high power consumption, such as electric heaters or ovens. Also avoid using multi-plug adaptors since these can result in reducing the sound quality, operation errors, and possibly damage.

# Turn Power OFF When Making Connections

 To avoid damage to the instrument and other devices to which it is Connected, turn the power switches of all related device OFF prior to connecting or disconnecting cables.

# **Handling and Transport**

- Never apply excessive force to the controls, connectors or other parts of the instrument.
- Always unplug cables by gripping the plug firmly, but not pulling on the cable.
- Disconnect all cables before moving The instrument.
- Physical shocks caused by dropping, bumping, or placing heavy objects on the instrument can result in scratches more serious damage.

## Cleaning

- Clean the unit with a dry soft cloth.
- A Slightly damp cloth may be used to Remove stubborn grime and dirt.
- Never use cleaners such as alcohol or thinner.
- Avoid placing vinyl object on top of The unit (uinyl can stick to and discolor the surface).

#### **Electrical Interference**

- This instrument contains digital circuitry and may cause interference if placed too close to radio or television receivers. If this occurs, move the instrument further away from the affected equipment.

# **Drum stand assembly**

- 1.Set up the drum stand. (Different model has different configuration)
- 2.Put the long cymbal tube/short cymbal tube/L shape pad rod into the drum stand.

3. Put the pads/cymbal/module to the relative position.

#### Note

When connecting the pads and audio source box, turn off the power switch please, otherwise it will destroy the drum kit

#### Connecting the pads and module

#### 1. DD-520 configuration:

# Connect with external devices

## Connect to audio system or amplifier

When connecting with audio system or drum amplifier, use a cable to connect with L/mono R of the audio system and the drum amplifier.

#### Note:

- 1). Connect with L/mono connector when connecting with mono audio device.
- 2). Connect with L/mono and R connector when connecting with stereo audio device.
- 3). The volume is controlled by the master volume knob of drum kit and of the audio device.

## Connecting the headphones

The audio source box has 1/4" headphone connector(if use a 1/8" headphone, use an adaptor), the volume is controlled by the volume knob of the audio source box.

# Connect to MP3 or CD player

Connect the output of MP3 or CD player or other audio sources with AUX.IN connector. The input signal can be mixed with the drum signal, strike the pads according to the rhythm of the input signal.

# Connect to a computer

1. Connect the computer via USB Receive and send MIDI signal.

2. Connect the computer via MIDI port

MIDI IN: receiver MIDI signal of computer or other devices.

MIDI OUT: send pad performance signal to external MIDI devices or computer.

## Connect with a MIDI keyboard

MIDI connector: If you're using an external MIDI keyboard or pads to control the digital drum, make connections as shown. Here, it is used as a sound module.

# Power supply and switch

Make sure the power is switched OFF. Connect the power adaptor to the DC IN jack on the side panel. After confirming that all connections have been completed, rotate the volume knob to the left (minimum volume level) before switching the power on. Set the power switch to the "ON" position. The KIT indicator on LCD will light up and the display will show kit number 01 pop 01.

#### Note:

Make sure the power is switched OFF when connecting the drum module with external devices.

# **Basic operating**

# Selecting a drum kit

after powering up, the digital drum will be in kit menu (kit indicator on ). the display should look like the following figure. there are 3 ways to activate the drum kit menu:

CLICK=4/4 TEMPO=100

KIT01 POP01

SONG01 DRUMON

- 1.Use the direction key ◀ ▶ to select drum kit.41 sets of drum kits in all.
  - 20 sets of preset drum kits:KIT01---26
  - 15 sets of user drum kits: USER01---15
- Pressing the Pad Select buttons allows you to preview the current kit (fixed tempo).

3. Hit the pads to play the current kit.

## Playing the pads

Similar to an acoustic drum kit, the digital drum responds differently to various playing techniques and dynamics. All the pads senses the striking force. and some voices change tone depending on the striking force.

# Drum pad and rim shot

The digital drum pad detects head and rim shots (rim shots Are different from the pad shots).

#### Note:

- 1.SKD200/210/220/230:SNARE and TOM1-TOM4 are dual channels. Both are rim shot.
- RIDE: it delivers RIDE BELL sound when hit strongly, and RIDE CYMBAL sound when hit Slightly.
- 3.SNARE delivers one sound when hit the pad and rim at the same time.

## Cymbal bow shot and choke

CRASH and RIDE have the bow shot and choke, e.g. hit the cymbal or the rim then hold the rim to CRASH or RIDE sound.

#### HI-HAT

The Hi-Hat sound varies depending on the position of the

Hi-Hat pedal:

Open Hi-Hat: Strike the Hi-Hat pad without pressing the pedal.

Closed Hi-Hat: Strike the Hi-Hat pad with the pedal pressed completely down.

Pedal Close: Press the pedal completely down without striking the pad.

Half-open Hi-Hat:Strike the Hi-Hat pad with the pedal pressed halfway down

# Adjusting the pad threshold

threshold: the minimum force to trigger a pad signal.

Setting a high threshold, the pad needs a strong force to generate a signal. This can avoid accidental response, e.g. other device or pad generate unnecessary signal.

Setting a low threshold, the pad needs a weak force to generate a signal.

User can adjust threshold based on external condition and performing style.

Threshold range:1---8

# Deleting crosstalk of the pads

When two pad are close, hitting one pad can cause the other pad generates a signal. This crosstalk can be deleted by setting a high parameter of the other pad.

#### Note

If two close pads are hit at the same time and one pad threshold is too high, the high threshold pad does not generate a signal, so take care to set threshold to avoid crosstalk.

# Instruction for pad parameter setting

#### 1. Pad curve

The curve is relative to the pad dynamic signal.

(default:CURVE2)

CURVE 1:very low dynamic response, high volume. If used to trigger the pads, the curve is flat.

CURVE2: the standard setting, during playing or when volume changes, it generates maximum natural signal.

CURVE3: compared to CURVE2, weak force generates relatively big change.

CURVE4: compared to CURVE2, strong force generates relatively big change.

CURVE5: compared to CURVE2, strong force generates very big change.

#### 2. Threshold

Threshold: the minimum force to generate a pad signal.

The high threshold needs strong force to generate pad signal. Low threshold needs weak force to generate pad signal.

Setting threshold needs to refer to playing style and external condition.

Threshold range: 1---8

#### 3. Crosstalk

If the crosstalk is too high, weak force is hard to trigger the pad. If the crosstalk is too low, it is easy to lead to crosstalk.

## 4. About saving

## Adjusting pad threshold

Threshold: the minimum force to generate a pad signal.

A high threshold needs a strong force to generate a signal and this can avoid accidental response, e.g. unnecessary signal from other device or pad.

A low threshold needs weak force to generate a pad signal.

User needs to adjust threshold according to the performance style and condition.

Threshold range:1---8

# Eliminating crosstalk of pads

When two pads are close, striking one pad can trigger one signal of the close pad, so you can set the close pad to a high threshold to avoid crosstalk.

#### Note

If the threshold is too high, and you strikes two pads at the same time, the weak force does not trigger a signal of a pad with high threshold, so set the threshold carefully.

# **MIDI** setting

This device is compatible with various MIDI devices. When it is used as trigger device or audio source, it is compatible with GM standard, and can be used with many sequencer software

#### **MIDI** connection

MIDI IN: inputs MIDI signal when connecting with external MIDI device
MIDI OUT: outputs MIDI signal when connecting with external MIDI device
USB: standard USB2.0 interface, connect with USB of MIDI device or PC. The operation system
has relative driver without the need to install again. Compatible with the PC system, e.g. Xp,
Win7,Vista,Mac OSX . After connection, the system recognizes this device as USB AUDIO DEVICE。
(USB only used for MIDI connection)

Note: when USB connects with PC, all MIDI data can transfer via USB

## Connecting with external audio device

This device automatically via channel 10 transfers drum signal to other MIDI device, including notes, forces, pedal performance, etc.

(Note: Song playback data and metronome notes are not transferred)

#### Record your performance with external sequencer

- 1. Connect with external sequencer or PC via MIDI OUT or USB interface.
- 2. Use the sequencer or the software to set channel 10 as a device to start recording.
- 3. Play the drum pads.
- 4. Stop performance and recording. Playback the recording.

#### Setting MIDI note number to be transferred/received by each pad

- 1. Press VOICE button to enter the VOICE menu.
- 2. Strike the relative pad, use direction key to select MIDI PITCH
- 3. Use the left/right key to MIDI value for a pad.
- 4. Press save button to save USER drum kit.

#### Change pad voice

When MIDI OUT or USB cable is connected with MIDI device or sequencer, it receives MIDI output signal and this device can play this signal. The voice changes while drum kit changes. This device has most part of the GM drum kit. User can create the own drum kits for performance.

Refer to the MIDI list for the support and limitation
