Do not expose the instrument to the following conditions to avoid deformation, discoloration or major damage:

- Direct sunlight
- Extreme temperature or humidity
- Excessively dusty or dirty place
- Strong vibrations or shocks
- In the vicinity of magnetic fields

Interference with other electrical devices, radios and TVs nearby may experience interference cause. Operate this device in a suitable Distance to radios and televisions.

Cleaning:

Only clean it with a soft, dry cloth.

Do not use paint thinner, solvent, cleaning fluids or chemically impregnated wipes.

Handling:

Do not apply excessive force to the switches or controls off.

Do not put paper, metal or other objects in the device.

Then leave the device to qualified check service personnel.

Disconnect all cables before moving the instrument.

Attention:

The normal function of the product can be disturbed due to strong electromagnetic interferences. In this case, simply reset the product, to resume normal operation by following the instruction manual. If the function still does not continue smoothly you can use the product on another place.

Product description

With the PDI-20, you can turn high-impedance, unsymmetrical audio signals into symmetrical, low-impedance signals. You have the option to input from sound sources with jacks - such as an electric guitar, electric bass or keyboard - and transfer them to devices with a symmetrical XLR input like a mixer.

In addition to the symmetrical XLR output, the passive stereo DI Box from Pronomic allows you to connect an amplifier over an asymmetrical output jack. Here the asymmetrical input signal is directly passed to the asymmetrical output jack.

Delivery

- 1x Pronomic PDI-20 passive stereo DI-Box

Specification

Pronomic PDI-20	passive stereo DI-Box
Frequency Range	15Hz - 30kHz
Input Impedance	50k Ω
Output Impedance	600 Ω symmetrisch
Connectors	two 6.35mm Jack Inputs, two 6.35mm Jack Outputs (through), two symmetric XLR- Outputs (male)
Ground-Lift	Ground-Lift AN/AUS
Stereo/Mono	Stereo/Mono button
Input level adapt	2x (0dB – 20dB – 40dB)
Dimensions	135 (W) x 120 (L) x 45 (H) mm
Weight	670 g

Intended use

Important safety instructions

- This electrical appliance complies with technical safety and electromagnetic compatibility standards.
- Never touch it with wet hands.
- Switch off your appliance: after use; in the event of malfunction; before cleaning it.
- Never operate your appliance when it has fallen.
- Never dismantle your appliance. An incorrectly repaired appliance can be dangerous for the user. If you encounter any problems, contact one of the Approved Service Centers in our customer service network.
- The warranty expires in case of damage caused when the product is not used as intended.
- Never use this device near bathtubs, showers or pools.

Usage

- **Signal Adjustment of the Input level**
Input signals with high levels like keyboards can be lowered to between 20-40 dB with a selector switch.
- **Stereo/Mono operation**
In the Stereo mode, both signals run separately through the device. Switch it on Mono, both signals will be combined.
- **Ground-Lift-switch**
With the ground lift switch, you can disconnect the ground connection of the XLR signal, in order to avoid ground loops.
- **Passive DI-Box**
Passive DI-Boxes need no supply voltage and do not have any preamp. With that they have a better audio signal than their active relatives.

Maintenance

Your appliance does not require any particular maintenance. However, in the event of a malfunction, **contact an Approved Service Center.**

WEEE Declaration (Waste of Electrical and Electronic Equipment)

Your product has been designed and manufactured using quality materials and components that are recyclable and reusable. The symbol means that your product must be disposed separately from household waste at the end of its service life.

Dispose of this equipment at your local collection point or recycling center.

Please help to protect the environment in which we all live.
