Accompaniment Variations

Specially created variation patterns can be added into the accompaniment, making your performance more professional and personalized.

INTRO

The Intro is the opening section of a song. When the Intro pattern is finished, it will automatically shift to the selected Main section. The length of the Intro section differs depending on the selected style.

MAIN

The Main is the principal section of a song. It will play and repeat the Main pattern until another section's button is pressed.

FILL IN

The Fill-in will automatically add a fill to your performance. When the Fill-in pattern is finished, it will shift to the related Main section.

ENDING

The Ending is the ending section of a song. When the Ending pattern is finished, the accompaniment will stop as well.

The length of the Ending section differs depending on the selected style.

Note:

During style playback, if you press and hold one of the MAIN [A]-[D] buttons, the Fill-in pattern will repeat until the button is released. Playback will then switch to the related Main section.

Chord Basics

A chord, in music, is a harmonic set of three or more notes that are heard simultaneously. The most common type of chord is a triad. A triad is a set of three notes that can be stacked in thirds. When arranged this way, the triad's notes, from lowest pitched to highest, are called: the Root, the Third, and the Fifth.

Triad Type

The basic triad types are as follows:

Major Triad	A root with a major third added above and a perfect fifth constitutes a "Major Triad".
Minor Triad	A root with a minor third added above and a perfect fifth
	constitutes a "Minor Triad".
Augmented	A root with a major third added above and an augment-
Triad	ed fifth constitutes an "Augmented Triad".
Diminished	A root with a minor third added above and a diminished
Triad	fifth constitutes a "Diminished Triad".

Chord Inversion

When a chord's root is not the lowest note in the triad, it is called an inversion chord. When the root note is the lowest note, it is called a root-position chord. If we put the Third and Fifth in the root position, it forms an "Inversion", so it is called an "Inverted Chord". A major triad and its inversion are illustrated on the right.

Chord Name

The chord name consists of two parts: Chord root and Chord type.

Major Triad Minor Triad

Diminished Triad Augmented Triad

Root Position First Inversion Second Inversion

Single Finger

Single-finger makes it easy to produce major, seventh, minor and minor seventh chords by pressing a minimum number of keys on the auto accompaniment section.

Press the root note and the nearest left black key simultaneously.

Press the root note and the nearest left white and black keys

Multi-finger

Multi-finger allows you to play chords in normal fingering. Try playing the 32 types of C chords listed on the right.

Full Range

In Full Range mode, it detects chords played in normal fingering (Multi-finger) over the entire keyboard range.

Adjusting the Tempo

Each style is preset with a default or standard tempo, but you can change it as needed.

The instrument recognizes USB flash drives (32M to 128G) in FAT32 format. It does not support multi-partitioned USB flash drives. We recommend formatting the USB flash drive on the instrument before using.

Note:

A USB flash drive in FAT32 format supports up to 512 files under its root directory. Exceeding this limit will make it unable to save or record to the USB flash drive.

Playing

- Press the [USB] button to enter the USB Play menu. The LCD shows all MIDI and MP3 songs under the root directory of the USB flash drive.
- 2. Use the data dial or [+/YES]/[-/NO] buttons to select a song.

- **3.** After saving, the LCD will prompt "User song save successful!", then return to the USB menu.

File Name Description:

"UserSong00X" is the user song name and number (corresponds to the user song on the instrument).

"NUB" is the track number of the saved song (001~512).

The MIDI function will expand your musical possibilities.

What's MIDI?

MIDI (short for Musical Instrument Digital Interface) allows a wide variety of electronic musical instruments, computers and other related devices to connect and communicate with one another. MIDI carries event messages that specify notation, pitch and velocity, controls signals for parameters such as volume, vibrato, audio panning, and programs change information to change the voice selections.

The instrument can output real-time playback information via MIDI messages and control external MIDI devices. The instrument can also accept incoming MIDI messages and generate sound accordingly.

Troubleshooting

Problem	Possible Cause and Solution
The speakers produce a pop sound whenever the power is turned ON/OFF.	This is normal and is no cause for alarm.
	1. Check if the master volume is set too low.
Speakers do not produce sound when the keyboard is played.	 Check if headphones are plugged into the PHONES jack. Check if the R1/R2/L1 voice volume is set too low (in the Mixer).
There is noise when I use a mobile phone.	Using a mobile phone in close proximity to the instrument may produce interference. To prevent this, turn off the mobile phone or keep it away from the instrument when in use.
The auto accompaniment does not play back even when Sync is in standby and a key is pressed.	You may be playing keys in the right hand range of the keyboard. To start the accompaniment with Sync Start, make sure to play keys in the left-hand range.
Certain notes seem to be in the wrong pitch.	Make sure that the tune value is set to 0. Hold down the [+/YES] and [-/NO] buttons and turn on the power to restore factory settings.
When connecting to computer, the instrument cannot be recognized.	Check if the USB cable is firmly connected. Try connecting another USB port on the computer. This instrument is plug and play and should work without installing a driver.
The pedal does not respond.	Check if the pedal cable is firmly connected.
It cannot read/save to the USB flash drive.	Make sure your USB flash drive is in FAT32 format and not multi-partitioned.
It shuts down after a period of time.	The auto power off function will turn off the instrument after a preset period of time when the instrument is not in use. You can adjust the auto-off function in the Function Menu.
