76 mm

Bassoon special
band bass pipe
joint

CAN BE ORDERED IN DIFFERENT MODELS AND MATERIALS

Brass / Brass Vintage Clear sound, a lot of “core” in the tone and fast response. “stereo like” surround sound.

Red Brass More round sound plus the above.

Silver plated Will provide a more brilliant sound as the silver plating enhances the high harmonics.

Solid silver Pure, warm sound abounding with overtones and even more surround sound image around the player.

Gold plated All of the silver but in all aspects superlative. Makes the overtones even more in tune because the pureness of the gold. The yellow gold sounds a bit darker than the rose gold.

Gold In all aspects superlative. Very in tune overtones. The 9 and 14 k gives you a very open and clear sound. Easy to play. The 24 k gives you the richest sound.

Platinum Superlative. Gives you a liquid and very big sound.

The materials have to match the materials of your instrument. Use at least the material of your instrument or a higher material to be sure of the best result. For wood instruments best result with solid silver or higher.

Enjoy your lefreQue!
